S LINK Ultra 5W

With a built-in 5W ultra-high-power radio and the proprietary S-Link Ultra protocol, SV5 delivers significantly extended working range up to **20km+** and enhanced link stability.

Featuring **dual transmission** via radio and network, the rover can automatically and seamlessly switch to a network data link once it moves beyond radio coverage—eliminating the need for manual reconfiguration after signal loss.

16

hrs working

High transmit power doesn't have to come at the cost of battery life. SV5 features an intelligent power management system that dynamically optimizes energy allocation under different conditions, enabling up to 16 hours of operation.

A dedicated battery status button on the bottom allows users to check the remaining power instantly—no matter the power is on or off.
